Fee Policy

Yolo County Code requires a permit for the construction, reconstruction, repair abandonment or change in use of a well. (Yolo County Code section 6-8.602) These permits expire and become null and void if the work is not commenced within 120 days (4 months) after the date of permit issuance, or if the work is suspended or abandoned for a period of 120 days any time after the work is commenced. (Sec 6-8.804(b)). However, the Environmental Health Department understands that construction times may be unpredictable, so the Department Policy is as follows: **The permit shall be considered valid for 365 days. After permit expiration, if work is resumed within one year of issuance a fee of ½ the current full permit fee shall be charged for permit renewal, provided that no changes have been made or will be made to the original plans. If one year has passed since the date of issuance, the permit is considered expired and a full permit and re-submittal shall be required.**
