

YOLO COUNTY

Health & Human Services Agency

Resource · Partner · Support System

Yolo County HHSA uses Netsmart's Electronic Health Record (EHR) system and is licensed to implement FHIR technology through their platform. Developers can access both the patient access and provider directory FHIR API resources at:

[FHIR API Resources](#)

While third-party developers must register an account with Yolo County HHSA to access the Provider Directory APIs, end users of these third-party applications should not be required to authenticate when accessing the provider directory. The token endpoint will be used for third-party application regardless of use case and authentication flow. This endpoint is accessed by the application rather than by the user directly.

Provider Directory Base URL:

<https://fhir.netsmartcloud.com/payer/provider-directory/v2/0dff3fd6-09fa-4245-a9e6-2f384ab1c82f/>
